JOHN RAINEY

Hoover, AL | jrainey456@gmail.com | Portfolio: rainydaydevelopment.com | linkedin.com/in/john-rainey

FULL STACK SOFTWARE ENGINEER

.NET Core | C# | React | SQL Server Architecture

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with over 7 years of enterprise software engineering experience specializing in C#, .NET Core Web APIs, React, and high-volume SQL Server data architecture. Proven track record of architecting scalable enterprise reporting tools, modernizing legacy modules, and optimizing high-throughput database queries. Experienced in building real-time telemetry applications, containerized web services, and automated CI/CD deployment workflows. Live portfolio and full application architecture available at rainydaydevelopment.com.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET Core, ASP.NET Web API, React, Next.js, Node.js, JavaScript (ES6+), TypeScript, T-SQL, HTML5/CSS3
- **Data & Architecture:** SQL Server, Stored Procedures, Index Optimization, Database Tuning, RESTful APIs, WebSockets, JSON/XML
- **DevOps & Tooling:** Docker, GitHub Actions CI/CD, Azure, Git, Visual Studio, VS Code, IIS

PROFESSIONAL EXPERIENCE

BioHorizons | Birmingham, AL
Software Developer | 2022 – Present

- Architect and deliver full-stack enterprise applications and RESTful Web APIs using C#, .NET Core, and SQL Server to support internal business operations and financial reporting.
- Refactor legacy database architecture and optimize multi-join T-SQL stored procedures on high-volume reporting tables, eliminating operational database timeouts during peak reporting cycles.
- Decommission legacy monolithic modules by migrating core business functionality into modern, maintainable C# Web API endpoints and responsive frontend interfaces.

- Collaborate with cross-functional business stakeholders, accounting leads, and platform teams to gather requirements, iterate on feature designs, and maintain high code quality standards.

Honda Manufacturing of Alabama | Lincoln, AL
Full Stack Software Engineer (Contract) | 2019 – 2022

- Architected and developed real-time assembly line telemetry dashboards using React, Node.js, and JavaScript to monitor plant operations and supervisor key performance indicators.
- Engineered live data ingestion pipelines to process asynchronous XML telemetry feeds from assembly-line PLCs, providing immediate operational visibility into production bottlenecks.
- Designed relational SQL database tables, indexes, and backend data access layers to support continuous, high-concurrency manufacturing analytics.
- Partnered with field engineers and plant management to refine UI/UX workflows, improving data clarity and operational response times for line supervisors.

EDUCATION

- **B.S. Computer Science** | Mississippi College, Clinton, MS (2016)
- **A.A. General Studies** | Holmes Community College, Ridgeland, MS (2011)

EARLIER TECHNICAL EXPERIENCE

IT Systems & Industrial Support Roles | 2016 – 2019

- **Plant Response Team Member**, Honda Manufacturing (2018 – 2019): Managed floor equipment support, PLC network troubleshooting, and industrial automated system maintenance.
- **IT Systems Administrator**, Salvation Army (2016 – 2018): Administered network infrastructure, server hardware, and end-user enterprise software systems.
