Professional Summary

Product-focused Full Stack Engineer with over 6 years of experience delivering scalable enterprise applications, real-time data platforms, and secure financial systems. Specialist in the .NET/React ecosystem with a proven track record of modernizing legacy architectures, engineering high-performance SQL backend structures, and championing code quality through testing and modern development workflows.

Technical Skills

- **Languages:** C#, JavaScript, SQL, Python, Java, C++, HTML5, CSS
- **Frameworks & Libraries:** .NET Core, ASP.NET MVC, React.js, Next.js, Node.js
- **Databases:** SQL Server, PostgreSQL, Database Design, Indexing, Optimization, Stored Procedures
- **Cloud & DevOps:** Cloud Infrastructure (Azure / Hybrid), AWS Familiarity, Docker, Git, CI/CD Pipelines
- **Tools & Modern Workflows:** RESTful API Design, Power BI, SAP Business Objects, GitHub Copilot, Codex

Professional Experience

Software Developer | BioHorizons

10/2022 - Present

- Architected and maintained enterprise-grade ASP.NET MVC web applications using custom controllers and UI components.
- Engineered complex SQL Server database structures and optimized stored procedures to support scalable application features and high-volume data.
- Led legacy modernization initiatives by converting Visual Basic codebases to modern ASP.NET architectures, increasing system maintainability.
- Designed a high-integrity finance and accounting application with a dynamic attribute system, ensuring transactional accuracy and streamlined financial reporting.
- Optimized database queries for data-heavy internal reporting tools, significantly reducing latency and improving system performance.

Full Stack Developer & Data Architect | Honda Manufacturing of

Alabama

05/2019 - 09/2022

- Developed full-stack applications to process and analyze live production data using React and Node.js.
- Engineered "Live Dashboards" utilizing XML data streams for real-time visualization of critical manufacturing metrics.
- Designed complex SQL backend architectures for SAP Business Objects to drive data-driven decision-making across departments.
- Performed root cause analysis on production issues by auditing application logs, stack traces, and database states to ensure 24/7 system availability.

Plant Response Team Member (PRT) | Honda Manufacturing of Alabama

05/2018 - 05/2019

- Provided on-call issue resolution plant-wide, diagnosing and resolving technical issues involving operational equipment (PLCs) and IT systems.

IT Systems Administrator | The Salvation Army

12/2016 - 04/2018

- Managed VMware server environments to ensure high system availability.
- Provided comprehensive help desk support (remote and on-site) for associates across a three-state region.
- Managed advanced troubleshooting for OS corruption, data recovery, and hardware failures.

Education

- **B.S. Computer Science** | Mississippi College, Clinton, MS (2016)
- **A.A. General Studies** | Holmes Community College, Ridgeland, MS (2011)
